

SAVAGE REFRACTORIES OLD OFFICE BUILDING

AL-V-A-037

Foundry Road, Mt. Savage
1901

This large two story, brick office building was originally built by the C & P Railroad Company in 1901. It presents an architectural picture that is unique to Allegany County in view of its pilastered wall features, its second story gothic sash windows with two sets of hood moulding over each, its numerous belt courses, and finally its flat-industrial type roof. The Mt. Savage Refractories Company acquired the structure in the 1960's and presently use it only for storage.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Savage Refractories Old Office Building is located along Foundry Road in Mt. Savage, Allegany County on the west side of the road near the intersection of Route 36.

The office building basically consists of a two story, five bay wide, rectangular shaped block. The building is of American Common Bond brick construction with a row of headers and six rows of stretchers, alterations. The entire facade is supported by a low brick foundation and exhibits a beveled brick water table. Wall features on the structure include pilastered and arcaded supports with spondrels and an interrupted belt course on the top of the Pilasters. A brick belt course surrounds the building at the top of the arches. Above the brick belt are found recessed brick panels; single panels above the respective arch on the sides and double panels above the arches on the front and rear. The roof of the structure is flat, is covered with asphalt materials and features a dentilated entablature decorated with brick houndstooth trim. Windows in the structure include double hung, wooden sash frames on the first floor, with four over one lights, a transom light and keystone cement pediments above each window. The second story windows feature double hung, gothic sash windows, with one over one lights and brick hood-moulds above each frame. The main entrance is located on the front eastern side and exhibits the original recessed double doors, which are paneled. A transom and large fanlight are found above the doors and a cement keystone arch is found above the entrance. Similar side and rear entrances are found around the building. No chimneys are visible on the structure; however, it is believed that there is a central chimney present.

The building is structurally very sound; however, offices for the company have been moved to a nearby structure.

BUILDER/ARCHITECT

C & P Railroad

STATEMENT OF SIGNIFICANCE

This large two story, brick office building was originally built by the C & P Railroad Company in 1901. It served administrative purposes for that company until 1944 when the Western Maryland Railroad became the owner. The Mt. Savage Refractories Company acquired the building in the 1960's, and presently use it for storage purposes only.

Of particular interest architecturally are the elegant brick wall features, including pilastered and arcaded supports with spondrels and an interrupted belt course on top of the pilasters. This detail is quite uncommon on other brick structures in Allegany County. The double hung Gothic sash windows that surround the second floor also present interesting variation of construction with the incorporation of two sets of brick hood moulding over each. It also features a unique, flat, industrial-type roof.

Interview with Mrs. Charles Carney, November 23, 1976.
